Guitar Songbook, Grade 1

Every Octave and Position

The 15 Grade 1 songs, moved up the neck one octave at a time,
each octave in several hand positions, with tab, fingers, chords and words.

Barney Musicals · Shine Worshippers Academy

How to use this book

Same song, same notes: higher or lower on the neck, and in different hand positions

Octaves

Each song is played in every octave that fits on a guitar, from the lowest to the highest. A guitar with 22 frets covers just under 4 octaves, so a song can be played in 4 octaves only when its tune is small (Mary Had a Little Lamb and God is so Good). Most songs fit 3 octaves; Bits of Paper, with the widest tune, fits 2.

Positions

In each octave the song is shown in up to 4 hand positions. Put your 1st finger on the fret named at the top of the page; the other fingers cover the next frets (finger 1 on that fret, 2 on the next, and so on). The same notes then sound the same, but feel different under your hand. Open position uses open strings near the nut.

The tab

Six lines are the six strings, high e on top. The number is the fret, 0 = open string. Above the tab: the chord to strum and the note names. Below: the finger (0 = open, 1 = index, 2 = middle, 3 = ring, 4 = little) and the words.

Orange notes

The home note of the song’s key (C or G) is orange, so you can always see where the tune comes home.

Practise

Learn the song in the lowest octave first. Then play the same song an octave higher, then in another position. Say or sing the note names as you play.
