Guitar Scales

in Every Key

All 12 major and 12 minor scales.
Each one in 1, 2, 3 and 4 octaves and in 7 positions,
with fretboard pictures, tabs, fingers and octave markers.

How to use this book

Every key has 11 pages: the same 11 ways for every major and minor scale

Ways 1 to 4: octaves

Way 1 is one octave in one hand position. Way 2 is two octaves, three notes on each of the five lowest strings. Way 3 climbs three octaves from the lowest home note. Way 4 uses the whole neck, from the lowest note up to fret 22: that is as close to 4 octaves as a guitar allows (a full 4 octaves needs a 24-fret guitar).

Ways 5 to 11: the 7 positions

Three notes on every string. Position 1 starts on the home note on the 6th string, position 2 on the 2nd note of the scale, and so on up to position 7. Together they cover the whole neck.

The picture

The neck as you see it looking down at your guitar: thin 1st string (e) on top, thick 6th string (E) at the bottom, the same as the tab. Each dot is a note to play, with its name inside.

Orange dots and dashed lines

Orange dots are the home note of the key. The dashed line joins each home note to the one an octave higher.

The tab

Six lines are the six strings. The number is the fret. Above the tab is the note name; below it, the finger (0 = open string, 1 = index, 2 = middle, 3 = ring, 4 = little). Long runs have no finger row: slide your hand up as you change strings.
